● GEOGRAPHY OF URUGUAY

Río de la Plata

The Río de la Plata, or Estuary of the Plata, is an estuary formed by the confluence of the Uruguay and Paraná rivers. Located in the south-eastern region of South America, it serves as a natural border between Argentina and Uruguay. Its width varies considerably, reaching its widest point at its mouth on the Atlantic Ocean, and it holds the title of the widest river in the world.

The Pampas

The Pampas, also known as the Uruguayan grasslands, form a vast region of fertile plains in Uruguay. This ecosystem is characterised by its temperate climate and the prevalence of grasslands, which are essential for livestock farming. The region boasts a rich biodiversity and plays a crucial role in the country's economy and culture.

Lobos Island

Lobos Island is a nature reserve of vital importance. It is home to one of the largest sea lion colonies in the world. This wildlife sanctuary offers opportunities for scientific research and responsible ecotourism. The conservation of its biodiversity is an ongoing and paramount challenge.
